

ProfeLAC[®]

BEEF PLUS

High quality nutrition and essential nutrients, ideal for calf rearers looking for a cost-effective and easy alternative to whole milk.
Formulated with Bovatec[®] 20CC as an aid in the control of coccidiosis in milk fed calves.

A high quality, casein based milk replacer formulated to promote growth and muscle development

- ✓ Highly digestible protein and fat, to support early growth
- ✓ Formulated with Bovatec[®] 20CC as an aid in control of coccidiosis
- ✓ Scientifically proven prebiotics, probiotics and postbiotics support optimal gut health, immunity and gastrointestinal tract development
- ✓ Added vitamins and minerals support early health, immunity and skeletal development

High quality ingredients are carefully processed to ensure optimal digestibility, making **ProfeLAC[®] BEEF PLUS** an easy to mix formula, suited to both once and twice a day feeding systems.

ProfeLAC[®] BEEF PLUS is specifically formulated to promote growth and muscle development. With added vitamins and trace minerals, a comprehensive gut health package, and Bovatec[®] 20CC as an aid in the control of coccidiosis, **ProfeLAC[®] BEEF PLUS** provides all the essential nutrients required for optimal health and well-being.

ProfeLAC[®] BEEF PLUS is a cost effective alternative to whole milk and is ideal for those rearing environments where coccidiosis has previously been identified.

ProfeLAC[®] BEEF PLUS

*High quality nutrition and essential nutrients ideal for calf rearers looking for a cost-effective and easy to use alternative to whole milk.
Formulated with Bovatec[®] as an aid in the control of coccidiosis in milk fed calves.*

Formulated with Bovatec[®], **ProfeLAC[®] BEEF PLUS** is a highly digestible calf milk replacer formulated to support lean tissue growth and development in calves. It can be used effectively in both twice-a-day and once-a-day calf rearing systems and is ideal for those rearing environments where coccidiosis has previously been identified.

FEATURE	BENEFIT	PRACTICAL IMPLICATIONS
 Premium quality casein-based milk replacer	Highly digestible fats and proteins	- Suitable for calves from 4 days old - Increased nutrient utilisation = value for money - Supports better growth rates - Reduced risk of nutritional scours
 Easymix technology	- Consistent small particle size - Stays in suspension	- Highly soluble - mixes easily, even in cold water or milk - More consistent calf growth
 Contains Bovatec [®]	Aids in the control of coccidiosis	- Reduced risk of coccidiosis - Ideal for environments where coccidiosis has previously been identified - Supports intake of Bovatec[®] during periods of low hard feed intake
 Added gut health package	- Scientifically proven probiotics, prebiotics and postbiotics - Added vitamins and minerals	- Supports early gut health and development for improved nutrient utilisation - Supports skeletal and immune development
 Natural betaine	- Aids hydration - Improved energy utilisation	- Aids maintenance and growth of papillae - Aids recovery from health challenges - Supports increased early growth
 Pasteurised	Free of any potential pathogens	Eliminates risk of disease transmission (e.g. Johnes disease and <i>M. bovis</i>)

ProfeLAC[®] BEEF, a coccidiostat free calf milk replacer, ideal for bobby calves, antibiotic free systems and fortifying whole or transition milk is also available.
